Allowable Subject Matter

1. Claims 1-8 are allowed. The following is an examiner's statement of reasons for allowance:

a. The prior art of record fails to sufficiently describe or suggest a device for monitoring the integrity of a structure comprising at least one pair of electrical conductors extending along and in contact with the structure, multiple resistors of known resistance and known location extending between each one of the at least one pair of electrical conductors, each of the multiple resistors in contact with the structure. Resistance measuring means are connected to each of two ends of the at least one pair of electrical conductors. Computing means are provided that incorporate the resistance measuring means and provide a real time output indicative of the integrity of the structure. The computing means continually monitors the resistance in the at least one pair of electrical conductors in real time and provides an indication of both location and extent of loss of structural integrity of the structure. These along with further limitations set forth by the claims render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
